

Safety with samos PRO

modular and powerful safety solutions

Highlights:

- samos PRO COMPACT - the safety control of the next generation - is a compact and fast modular safety microcontroller for the monitoring and control of mechanical and system engineering applications
- Integrated „know-how protection“
- Programmable with the NEW modern programming tool samosPLAN5+ incl. process simulation and logic analyzer
- The system enables the implementation of complete and economic safety solutions which are more flexible than conventional relay technology
- Easy to use with graphical device configuration and a functional diagram editor with extensive certified function block library
- Very convenient (diagnosis, simulation, start up mode)
- High safety combined with convincing cost efficiency
- The modular design also enables expansion at a later stage and therefore flexible planning with a reduced variety of module versions. Easier handling and logistics.

Technical features:

- Certified in accordance with PLe/Kat.4 (ISO 13849-1) and SIL3 (IEC 62061)
- 16 safety inputs, 4 safety outputs and 4 switchable safety in-/outputs on a mounting width of 45mm, expandable up to 116 safety inputs and up to 56 safety outputs
- Compact safety solutions from a mounting width of 45 mm
- Minimum reaction time of 12ms
- Connection to a standard VIPA controller via fieldbus gateways (PROFIBUS, PROFINET and CANopen, MODBUS/TCP and ETHERNET/IP)
- The use of Ethernet gateways allows online access including programming, and remote maintenance
- 4A wear and tear-free on each single output of the system
- 512MB changeable and easily usable program memory SP-COP-CARD in SD card format
- Environmental temperature range of -25 °C up to +65 °C
